SUMMARY

A creative, detail-oriented Full Stack Developer with expertise in Java, Spring Boot, Hibernate and front-end technologies such as HTML5, CSS3, JavaScript and React.js. Good knowledge in the development of scalable, high-performance web applications, including the creation of high-end user interfaces that are integrated with high-end back-end architectures. Experience in working with RESTful APIs, microservices, and databases such as SQL and MySQL for a seamless user experience.

EDUCATION

Bachelor of Computer Application (Honours), Patliputra University

2021 - 2024

SKILLS

Web Technologies:	HTML5, CSS3, JavaScript,
Frameworks and Libraries:	React.js, Spring Boot
Programming Languages:	C, C++, Java (Advance)
Version Control	Git, GitHub
Development Tools:	Eclipse, VS Code
Data Access & Database:	JDBC, Hibernate, SQL, MySQL
Soft Skills	Team Collaboration, Adaptability, Time Management, Problem-Solving

EXPERIENCE

Web Development Intern

September 2023

Appwars Technologies PVT. LTD.

- Gained hands-on experience in **virtual experiments** and **simulations**, improving practical understanding of **web development** concepts.
- Developed **responsive web applications** using **HTML**, **CSS**, and **JavaScript**, enhancing front-end development skills.
- Improved technical capabilities in **software analysis** and using **simulation** tools.
- Received **mentorship** from experienced faculty and professionals, gaining insight into industry standards and best practices.
- Contributed to accessible **virtual lab experiences**, providing immersive learning for theoretical concepts.

PROJECTS

AI-Powered Conversational Assistant

- Developed an interactive **web-based AI chatbot** inspired by **Google's Gemini**, leveraging modern web development technologies.
- Created a **responsive UI** using **React JS Framework** ensuring seamless user experience across devices.
- Integrated **dynamic conversational interactions**, **real-time AI-generated responses**, and **multimodal capabilities** for enhanced engagement.
- Implemented real-time feedback mechanisms to improve chatbot accuracy and user satisfaction.

HealthCare.com : Web-Based Patient & Appointment Management

- Developed a web-based clinic management system using **HTML** and **CSS** for a **responsive** and **user-friendly** frontend.
- Implemented backend functionality using **Java Servlets** and **JSP**, enabling dynamic content rendering and seamless user interactions.
- . Integrated **MySQL** database with **JDBC** to manage patient records, appointments, and doctor schedules efficiently.
- Designed a **secure** and **scalable** system to handle patient data, ensuring data integrity and privacy.
- Enhanced user experience by incorporating **interactive UI** elements and **real-time validation** for appointment booking.
- Collaborated with a team to align the system's functionalities with healthcare requirements and improve operational efficiency.

Backend CRUD Application (Hibernate)

- Developed a robust backend for a **CRUD** (Create, Read, Update, Delete) application using **Java** focusing on handling database operations efficiently without a frontend interface.
- Integrated with **Hibernate** for database interaction and performed SQL operations like **INSERT**, **SELECT**, **UPDATE**, and **DELETE**..
- Handled exception management and ensured smooth error handling for database queries.
- Followed Object-Oriented Programming principles to create reusable and modular code.

Certificates

- Java Full-Stack Developer Certified by Appwars Technology.
- Hacker Rank SQL Certificates
- Hacker Rank Java & SQL 5 Star Badges
- Certificate of Completion of Basic DSA
- IIT Mumbai Java Certificates
- IIT Mumbai HTML Certificates
- IIT Mumbai C, C++ advance Certificate

Interest

- Researching new technologies
- Visiting new places
- AI Tools like ChatGpt, Copilot, Gemini, etc.
